## NEWS RELEASE

### RPM to Introduce Latest Addition:

#### The 4-valve HEMI engine for Motorcycles.

HAYDEN, Idaho – July 16, 2007 – Revolution Performance Motors CEO A.J. Basile has added The ONE, The ONLY fully engineered and tested 4 Valve HEMI Engine to RPM's line of Motorcycle Products.

**More Torque and More Horsepower** is what the Hemi Engine is all about. The powerful Hemi 4 engine moves 1.5 times more air than any 2 valve engine and can run much higher compression due to the hemispherical position of the spark plug, allowing for a 25 degree ignition curve (the Harley engine has a 35 degree curve).

The Head Kits bolt right onto any EVO Style Configuration and Aftermarket Engines or can be mounted onto Custom Made Renegade Motorcycles, RPM's sister company, or most Custom Frames.

For more Information on the Hemi Engine or on how to become an Exclusive Hemi Engine Dealer, please visit RPM's website at <http://www.rpmhemi.com> or contact the Hemi Guys at (208) 762-8515, sales@rpmhemi.com.
