I have had my business in the custom paint world for 12+ years. Kimmy's info guide is the first advertising we have done. All of our work has come to us word of mouth. We have been very fortunate in getting our name out there. We have expanded from a 400 square foot shop to 5000 sq feet. On average we have 10 to 12

employees. We paint for a lot of sand rail manufacturers and off-road race teams, rhino builders, and motorcycle shops. We currently have 3 artists plus myself, along with a couple of body men, some sanders and buffers. Everyone in our shop is just as

important as the other. Prep and bodywork done

right help the art look good, and without an awesome shine the art doesn't look good. Customer service is what we try to make stand above the rest. Keep people happy and they will return.

Waiting to paint your ride,
Martin Nash
