"Let's Race our Bikes out at Speed World Instead"

I just wanted to take a moment to say hello to all my brothers and sisters living and riding in this two wheeled circus. I can't imagine living

without a motorcycle. I am a little concerned the other day I was hanging out in one of my favorite spots "Bob's Cycle Salvage", and while talking to one of the techs I realized four out the ten bikes I was looking at were fatalities and the others were serious injuries. So I dug a little deeper and found that a concerning number of these accidents were a direct result of street racing, stunt riding, and the rest were more than likely a cage driver not paying attention. Now let's face it I love high speed wheelies as much as any of you but the traffic in Arizona is psycho and it is getting harder to find a place to let it all hang out. Now I have found my oasis, the people out at SPEED WORLD have a great facility and are willing to provide a safe atmosphere for all of us to let loose. They are sponsoring legal drags for cars and street bikes. They are also throwing in burn out and wheelie contests. Now if you think you are bad ass on the streets lets see how you do in front of over a hundred people sitting in the stands cheering for you! I have heard time and time again how fast your bike is now it is time to prove it with a time slip! So let's remember street racing can cost you your license or maybe even your life!! So let's take it to the track! !
