

BUDDY STUBBS
**ARIZONA HARLEY-
DAVIDSON**
BY JD AND YOUR SERVICE TEAM
602-971-3400

At Buddy Stubbs Arizona Harley-Davidson, we believe your Harley-Davidson motorcycle should always live up to its name. In keeping with this philosophy, we'd like you to know that having regularly scheduled service performed by H-D trained professionals can help ensure that your H-D motorcycle continues to deliver a riding experience like no other.

As you may know, your H-D motorcycle requires maintenance on regular intervals based on mileage. But what does this really mean? With the cost of living these days, who can afford a \$300 oil change? Stop right there. One of the biggest misconceptions of riders is that a trip to the local dealer is nothing more than a glorified oil change. Nothing could be further from the truth. Each visit the vehicle receives at least a 25-point comprehensive inspection depending on the model. This includes fluid changes, adjustments, replacements, lubes, and system operation verification. Once completed, the vehicle receives a complementary detail and wipe down. The Maintenance Scheduling section in the back of the Owner's Manual has a table that lists all of the necessary procedures. If you don't have your Owner's Manual handy, another great source for information is www.harley-davidson.com. In the Motorcycle menu on top of the home page, click the Service and Maintenance link. Open the Service Check-up and you will be able to determine your next required maintenance specific to your own VIN number and mileage.

While you are always welcome to schedule ahead, no appointment is necessary for regular maintenance, tires, oil changes and small accessory installations. Most jobs can be completed within a 48-hour period. We are an authorized Harley-Davidson Extended Service repair facility. We also offer emissions repair and testing, dynotuning, and insurance claim repair. Please contact us at 602-971-3400 at your convenience. Our service department is open for drop off Mon-Sat 7am-7pm & pickup 8am-7pm. Don't forget to ask about our free labor accessory installation during the service.

As always, our commitment to both you and your H-D motorcycle means that our H-D trained technicians use only original H-D parts and the latest H-D approved tools and equipment. We look forward to hearing from you.

Sincerely,

JD and Your Service Team
